Description :

Prsentation de l'diteur The captivating story of the titans, engineers, and pilots who raced to design a safe and lucrative passenger jet. In Jet Age, journalist Sam Howe Verhovek explores the advent of the first generation of jet airliners and the people who designed, built, and flew them. The path to jet travel was triumphal and amazingly rapid-less than fifty years after the Wright Brothers' first flight at Kitty Hawk, Great Britain led the world with the first commercial jet plane service. Yet the pioneering British Comet was cursed with a tragic, mysterious flaw, and an upstart Seattle company put a new competitor in the sky: the Boeing 707 Jet Stratoliner. Jet Age vividly recreates the race between two nations, two global airlines, and

two rival teams of brilliant engineers for bragging rights to the first jet service across the Atlantic Ocean in 1958. At the center of this story are great minds and courageous souls, including Sir Geoffrey de Havilland, who spearheaded the development of the Comet, even as two of his sons lost their lives flying earlier models of his aircraft; Sir Arnold Hall, the brilliant British aerodynamicist tasked with uncovering the Comet's fatal flaw; Bill Allen, Boeing's deceptively mild-mannered president; and Alvin "Tex" Johnston, Boeing's swashbuckling but supremely skilled test pilot. The extraordinary airplanes themselves emerge as characters in the drama. As the Comet and the Boeing 707 go head-to-head, flying twice as fast and high as the propeller planes that preceded them, the book captures the electrifying spirit of an era: the Jet Age. In the spirit of Stephen Ambrose's *Nothing Like It in the World*, Verhovek's *Jet Age* offers a gorgeous rendering of an exciting age and fascinating technology that permanently changed our conception of distance and time, of a triumph of engineering and design, and of a company that took a huge gamble and won.

Revue de presse "Breezy and fact-filled history...Mr. Verhovek spins a fine yarn that includes big money, war, sex and power." *The Wall Street Journal* "Jet Age is a page-turning detective story with characters as finely drawn as those in a work of fiction, and infused with an infectious sense of wonder that drove ordinary men and women to reach for extraordinary heights." *The New York Times*

Presentation de l'auteur The captivating story of the titans, engineers, and pilots who raced to design a safe and lucrative passenger jet. In *Jet Age*, journalist Sam Howe Verhovek explores the advent of the first generation of jet airliners and the people who designed, built, and flew them. The path to jet travel was triumphal and amazingly rapid—less than fifty years after the Wright Brothers' first flight at Kitty Hawk, Great Britain led the world with the first commercial jet plane service.
