## Description :

Prsentation de l'diteurMaking small boxes is a favorite project for many woodworkers. While it may seem a simple process, there are many ways to build a box -- and in this comprehensive pictorial reference, veteran woodworker Doug Stowe covers all the techniques you will need to produce boxes youll be proud of. Youll learn about making boxes by using traditional carcasse joinery or by shaping on the bandsaw or lathe. Stowe also covers special boxmaking techniques associated with making lids and bases, attaching them to the box, and partitioning boxes to hold small objects like jewelry. Additionally, there are a host of techniques for creating special effects that decorate a box, turning the small, useful object into a jewel itself. This book covers all these methods in a highly visual format that has become the hallmark of the Complete Illustrated Guide series: Everything is covered in over 500 step-by-step photos accompanied with straightforward text.Prsentation de l'diteurMaking small boxes is a favorite project for many woodworkers.
